Estructura Datos

- ▶ Controllers – Endpoints
- ▶ DAO
- ▶ Mapper
- ▶ Service

Item – ItemDTO

```
@Entity
@Table(name = "Items")
public class Item implements Serializable {

    4 usages
    private int idItem;
    4 usages
    private String tipo;
    4 usages
    private String nombre;
    4 usages
    private String genero;
    4 usages
    private String autor;
    4 usages
    private int duracion;
    4 usages
    private String rutaPortada;
    4 usages
    private int estreno;
    4 usages
    private String sinopsis;
    3 usages
    private Set<Review> reviewSet;
```

```
public class ItemDTO {

    4 usages
    private int idItem;
    4 usages
    private String tipo;
    4 usages
    private String nombre;
    4 usages
    private String genero;
    4 usages
    private String autor;
    4 usages
    private int duracion;
    4 usages
    private String rutaPortada;
    4 usages
    private int estreno;
    4 usages
    private String sinopsis;
    4 usages
    private Double puntuacionMedia;
```

Review – ReviewDTO

```
@Entity
@Table(name = "Reviews")
public class Review implements Serializable {
    4 usages
    private int reviewID;
    4 usages
    private int idItem;
    4 usages
    private String usuario;
    4 usages
    private int puntuacion;
    4 usages
    private String contenido;
    3 usages
    private Item item;
```

```
17 usages
public class ReviewDTO {
    4 usages
    private int reviewID;
    4 usages
    private int idItem;
    4 usages
    private String usuario;
    4 usages
    private int puntuacion;
    4 usages
    private String contenido;
```

Estructura Flutter

Demo

Mejoras futuras

- ▶ Crear RESEÑAS
- ▶ Sistema de LOGIN
- ▶ ROLES Usuario/Administrador
- ▶ RECOMENDACIONES personalizadas

Gracias por vuestra atención
